

## JLG Telehandler Attachment

JLG Attachments - After retiring in the late 1960's, John L. Grove started on a cross country RV voyage. After spending many years establishing his family built crane company with his brother, John had no idea that this trip would give birth to the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision materials handling equipment was the end consequence of a road expedition.

All through their trip, John reacquainted himself with previous business associates along the way. In combination with these conversations and a noteworthy event; two workers had been tragically electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John discovered a considerable marketplace for a product that could swiftly and securely lift people in the air to accomplish upkeep and other construction functions.

Upon returning from their travels, John formed a joint venture with two friends and purchased a metal fabricating business in McConnellsburg, Pennsylvania. In 1970, starting operations with a crew of twenty personnel, they built and sold the first JLG aerial work platform. The business incorporates many of the simple design essentials of that original lift into existing designs.

Since then, JLG Forklifts have come a great distance from when Mr. John L. Grove came back from his fatefull cross-country trip and since the first JLG aerial platform entered the market. As of today, the business has extended itself into many different international markets and continues to cultivate contemporary machines to ensure that clients are able to become safer and more efficient within their workplace.
