

## Utility Bucket

Utility Bucket - "Slip on the forks" accessory buckets or Universal Fit buckets could be utilized along with any model or design of extendable reach lift truck. If your unit is unable to be matched with a quick-tach unit, another new or second-hand universal fit bucket could be located as an alternative. Regular universal lift truck buckets connect to blades which are up to 6" wide and are 48" long. Larger fork pockets could be prearranged via an account executive upon request.

Because universal fit lift truck buckets slip onto the blades directly, they stay on the machinery and are less vulnerable to damage. These buckets are even fifty percent deeper as opposed to the quick-tach bucket models. This extra room makes them ideal for lifting irregular shaped loads like broken up concrete, backfilling behind walls, tearing off roof trash, elevating roof gravel and moving large debris piles.

### Quick-Tach Buckets

Quick-Tach Buckets are constructed for extendable-reach lift trucks. They are built to allow positioning of material way beyond the reach of a loader. A hardened beveled cutting blade on the leading edge and on both sides reinforces strength, resistance to wear and provides supreme durability. Quick-Tach lift truck buckets are enhanced by scuff bars along the base of the unit that protect it from scrapes.

Quick-Tach lift buckets could in several situations replace the blades and carriage of a lift truck, that may weigh somewhere between 100-700lbs. These buckets when installed can free up more load capacity, enabling it to deal with both bigger and heavier things. The Quick-Tach can pour items about 1.5 feet higher because of the shorter depth of its bucket. These buckets are fabricated in a customized fashion so as to suit the specifications of specific models and makes of lifts. It is important to talk to a construction equipment specialist in order to find the modified Quick-Tach bucket solution for your needs.

Forklift bucket accessories are great for construction work on the ground level. They can be used to transport snow in the northern regions, gravel and even sand. Clean-up on the jobsite could be likewise be done with a forklift bucket. The numerous purposes the bucket can do saves the business much money and time in view of the fact that it does have to absolutely switch tools or equipment and this could help avoid running into overtime.
