

Barrel Clamps

Barrel Clamps - Known as "Barrel Clamp", this particular hydraulic attachment is actually utilized on forklifts in order to compress items which you need to move utilizing the forklift. Typically, they are used in order to paper rolls, barrels, and handle kegs, with several barrel clamp designs having the ability to rotate the load. For example, the rotate function allows a forklift operator to be able to put in a vertically stored paper inside the horizontal intake of a printing press.
