

## JLG Forklift Part

JLG Forklift Parts - After retiring in the late 1960's, John L. Grove set out on a cross country RV voyage. After spending many years establishing his family built crane company with his brother, John had no idea that this trip would give birth to the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision material handling technologies was the end consequence of a road expedition.

While on their trip, John spent time conversing with previous business contacts whom the Groves stopped to see along the way. These conversations combined with a tragic incident-two workers being electrocuted on scaffolding when the Groves were traveling to the Hoover Dam- John uncovered a considerable marketplace for a product that could quickly and safely elevate individuals in the air to accomplish maintenance and other building functions.

After returning from their vacation, John set up a joint venture with two of his friends and obtained a metal fabrication business in McConnellsburg, Pennsylvania. Opening with a small crew of twenty personnel, they fashioned and sold their first JLG aerial work platform in 1970. The business incorporates many of the simple design elements of that original lift into current designs.

JLG forklifts have come a long way from the time when Mr. John L. Grove returned to town from his cross-country road trip and since the first aerial work platform debuted on the market. At present, the business proudly continues to expand itself into different marketplaces globally and develops new products to make sure clients are capable of being more effective and perform in the workplace within a safer atmosphere.
