

## **Forklift Electrical Part**

Forklift Electrical Parts - Lift trucks can be purposely marked to be utilized in dangerous sites. A labeled truck denotes the design has met the minimum standards of ANSI/UL 558 meant for engine powered trucks or ANSI/UL 583 utilized for electric trucks for the type of label attached.

The use for labels used for lift trucks may be found in National Fire Protection Association NFPA 505 - Powered Industrial trucks including: Maintenance and Operation, Type Designations, and Areas of Use. Check with your local insurance provider and Fire Marshall for further information concerning the permitted uses of industrial powered trucks in your application.

If the certain forklift satisfies the outlined criteria, labels may be put. A labeled forklift will show the type of designation put on the nameplate and will have a correctly corresponding label placed.
